- Select **Tools** then **Annotation** to open the Annotation toolbar.

- First, create an Annotation Set to store your annotations in the model.
- Select the *New Annotation Set* command.

- Enter the needed information in the New Annotation Set dialog.

A screenshot of a 'New Annotation Set' dialog box. The dialog has a title bar with a question mark and a close button. It contains four text input fields: 'Name' with 'To Be Determined', 'Author' with 'John Doe', 'Telephone' with '555-1212', and 'E-Mail' with 'john.doe@nasa.gov'. To the right of these fields are three buttons: 'OK', 'Cancel', and 'Help'. Below the input fields is a 'Comments' section with a text area containing the placeholder text 'Enter your comments here'.

New Annotation Set ? X

Name: To Be Determined OK

Author: John Doe Cancel

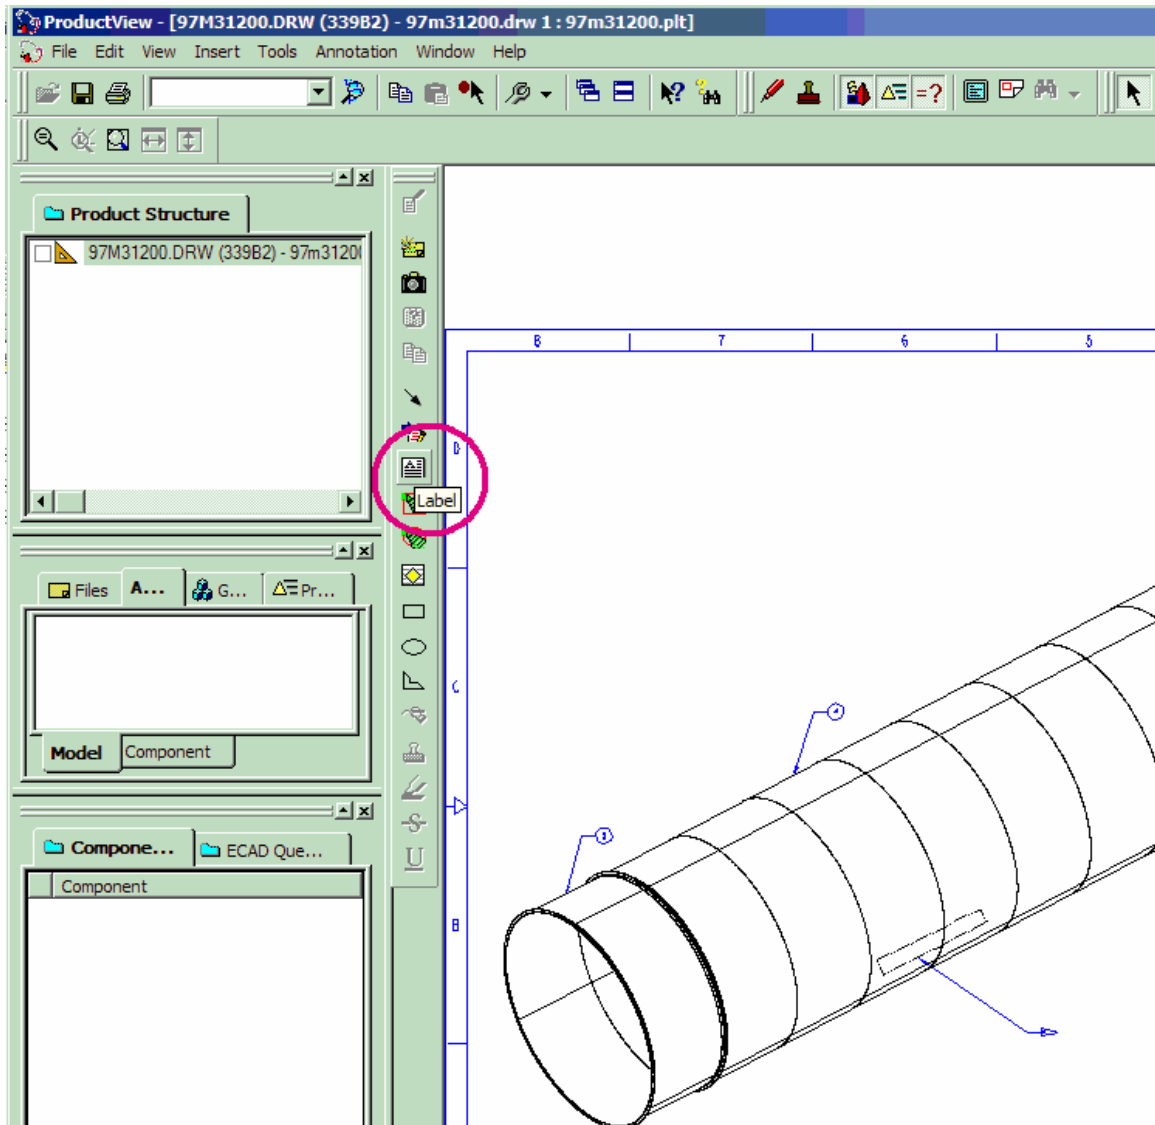

Telephone: 555-1212 Help

E-Mail: john.doe@nasa.gov

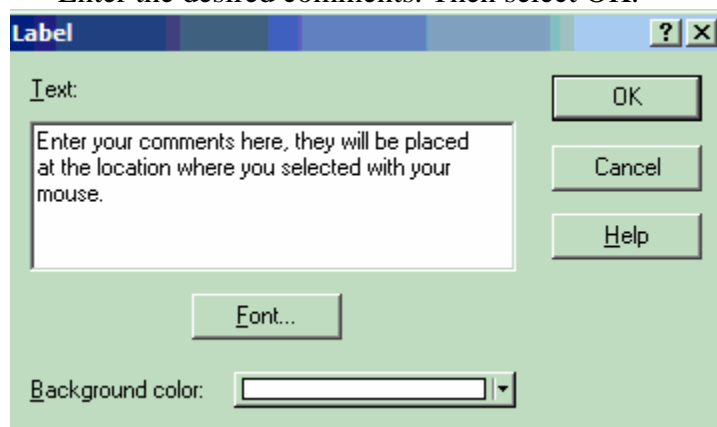

Comments:

Enter your comments here

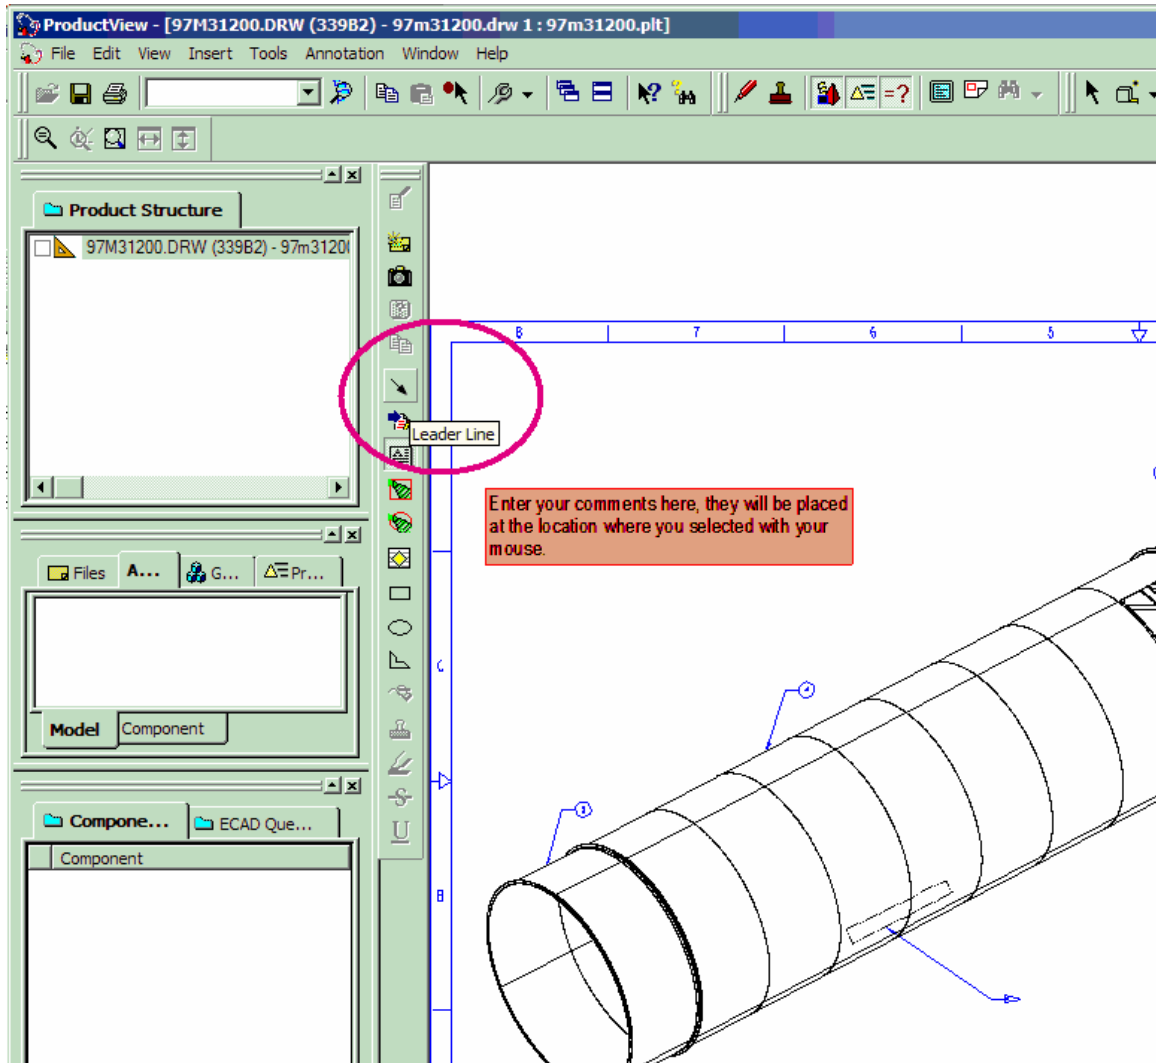

- Next, select the *Label* command.

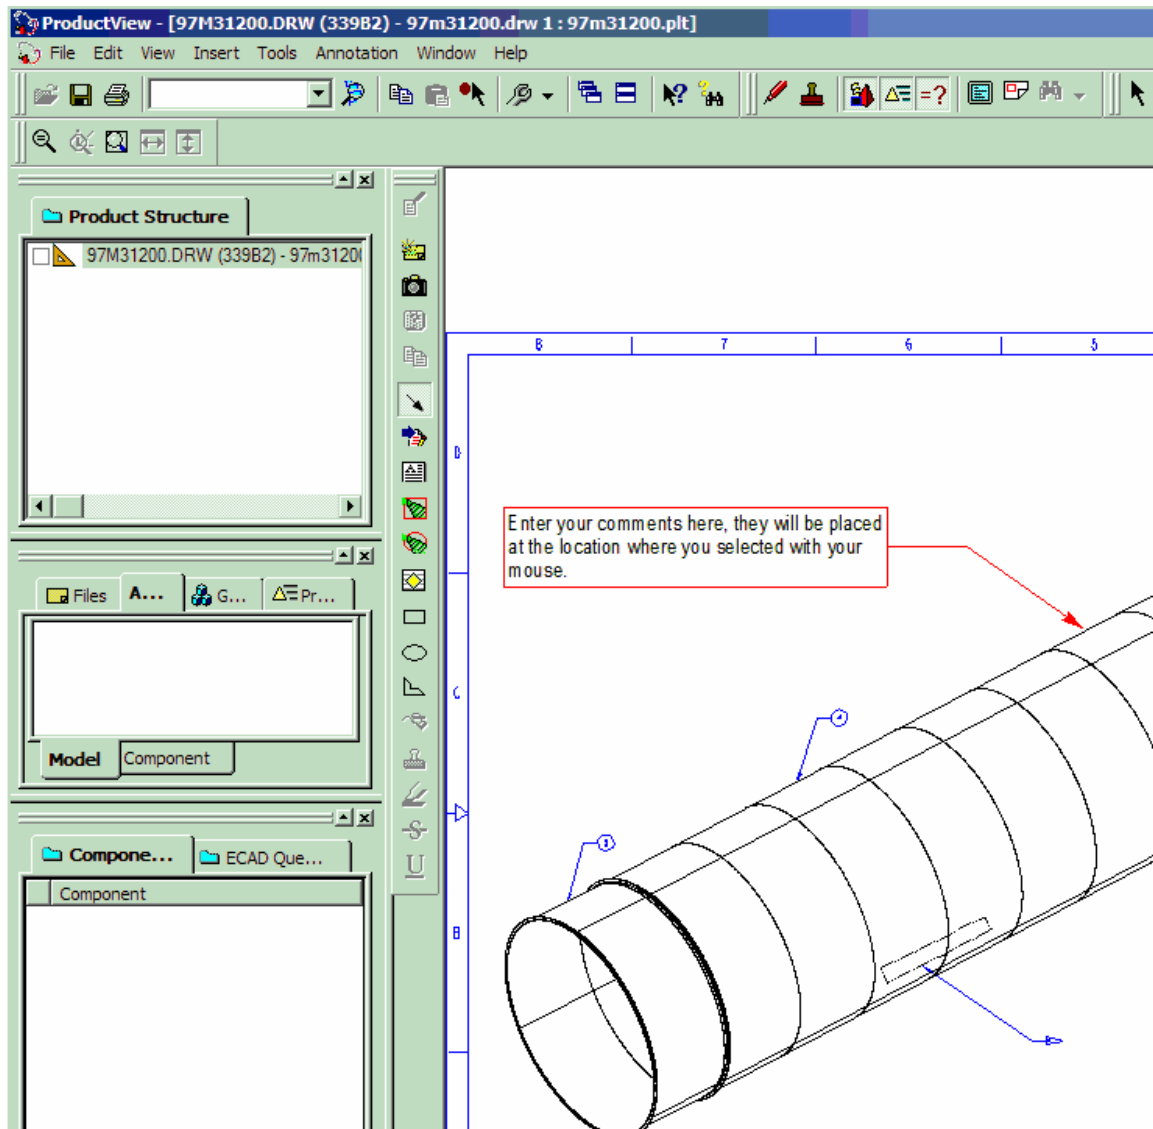

- Place the Cursor in the general location where you want your note, you can move it later.
- Enter the desired comments. Then select OK.

- Now select the **Leader Line** command.

- To place the Leader Line select the area you want to specify then select the previously placed Label

- Once you are finished select **File, Save Product Structure.**

NOTE***

The process for naming and saving the Annotation Set is still being developed.
